

Prater Ltd is a leading building envelope contractor to the construction market, supplying and installing roof, wall and associated products. We recognise that our activities on construction sites and at our offices impact upon the environment and it is our intention to reduce these impacts in every part of our business.

We have developed an environmental management system in accordance with ISO 14001: 2004. This will be central in implementing and administering procedures with the aim of reducing the impact our activities have upon the environment.

The company is committed to complying with legal, client and other requirements. These shall be identified and regularly reviewed to ensure that the company still meets the requirements of legislation and our clients.

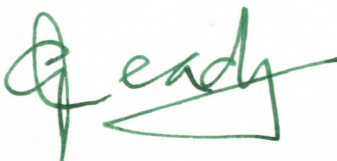

The company is also committed to preventing pollution throughout its operations and to continual improvement in its environmental performance.

To this end, it has set key environmental objectives and targets, which will be reviewed periodically. These are to:

- Improve our efficiency in the way we use material resources
- Reduce energy use
- Reduce waste & packaging

To ensure that all staff and operatives are aware of the Prater environmental policy, it will be communicated to all staff, operatives, subcontractors and suppliers. It will also be available for our clients and other interested persons to examine when requested.

This environment policy will be reviewed and amended when required at regular intervals by top management.

Chris Leach
Environmental Director
